1-303. Scope of appeals and types of appellants. Appeals to the Commission and the matters which can be appealed are as follows:

(a) An appeal may be submitted by any person adversely affected by the administration of building standards or administrative regulations of Title 24, or the enforcement or the lack of enforcement of Title 24, by any state agency as prescribed in Health and Safety Code Section 18945(a) and this article.

(b) An appeal may be submitted by any person adversely affected by the enforcement of Title 24 by a local enforcement agency, in the company of the local enforcement agency, as prescribed in Health and Safety Code Section 18945(b) and this article. Such joint appeals must have statewide significance.

(c) An appeal may be filed by any person, including a state or local agency adversely affected by an apparent conflict, duplication or overlap of any current Title 24 provision, or any other matter of statewide significance relating to the application of Title 24.

(d) The Commission may accept appeals relating to actions and decisions by state and local agencies to enforce building standards, but may only make recommendations for reconsideration. The Commission has no authority to overturn a decision by a state or local agency when the matter is within the jurisdiction of that state or local agency.

(e) When the basis of an appeal is the action of a state agency other than the Commission, the appellant must obtain a final determination from the state agency in question relating to the issue under appeal before the Commission will hear the appeal.

Exception: An apparent conflict, duplication or overlap in other available state appeals procedures or within the regulations or code.

1-315. Criteria for petition. A petition for the adoption, amendment or repeal of a state building standard must meet the following criteria:

(a) The subject issue must have statewide significance and must have implications for a whole category of projects or a broad range of project types, and:

(b) The rationale for the petition must take the form of at least one of the following criteria:

1. A current building standard conflicts with pertinent statute(s). To substantiate this criterion, the petitioner must cite the subject building standard and the conflicting statute(s), and provide a clear written description of why the two are inconsistent.
2. Compliance with a current building standard is routinely impossible or onerous. To substantiate this criterion, the petitioner must cite the current building standard, present written or photographic evidence of the difficulty in complying with it, and clearly show that the problem is common or potentially common to many different projects or project types in many different circumstances. This criterion shall not be used to justify a petition for the repeal or amendment of a current building standard that poses difficulty to a single project.
3. A current building standard is inefficient or ineffective. To substantiate this criterion, the petitioner must cite the subject building standard, provide clear and concise written or photographic evidence of its ineffectiveness or inefficiency, describe a proposed alternative, and

provide clear and convincing written or photographic evidence that it is more efficient or effective.

4. A current building standard is obsolete. To substantiate this criterion, the petitioner must show at least one of the following facts:

- A. A material or product specified in the building standard is not available, or
- B. There is no statute authorizing the subject building standard, or
- C. Significant developments in procedures, materials or other issues subject to the building standard have created a need for amendment or deletion of the building standard; that current state statutes permit amendment or deletion of the building standards; and that the building standard has the effect of prohibiting the use of a material or procedure that has demonstrated satisfactory performance and meets the intended purpose of building standards.

5. There is a need for a new building standard. To substantiate this criterion, the petitioner must provide a clear written description of the proposed building standard, explain why it is necessary, and cite the statute(s) that require or authorize the new building standard.

1-323. Criteria for denying a petition. The Commission, proposing agency or adopting agency, whichever is processing a petition, may deny a petition for cause using at least one of the following criteria:

(a) The subject building standard is already scheduled for review at the next regular triennial or other scheduled adoption. To substantiate this criterion, the Commission or agency shall include in its written denial a schedule for the planned review. Alternatively, the agency may approve a petition but defer its implementation until the next scheduled adoption.

(b) The issues cited by the petitioner are factually incorrect. To substantiate this criterion, the Commission or agency shall identify in its written denial the incorrect facts.

(e) Resolving the issues raised by the petitioner would compromise the agency's ability to carry out its legal mandate. To substantiate this criterion, the Commission or agency shall include with its denial the specific ways in which its legal mandate would be compromised.

(f) The building standard proposed by the petitioner would create unnecessary hardship or expense; inappropriately exclude materials, equipment or brands; include only specific brands; conflict with federal or state laws or regulations or existing building standards; or the building standard is otherwise without merit and public benefit.
